

# What's New?

## @prompt 7.0 vs. @prompt 2004

PROMT presents the new @prompt 7.0 translation software at CeBIT 2005. The previous version @prompt 2004 was released at the last year CeBIT. What's new in @prompt 7.0? Read more about the most important new features of @prompt 7.0 below!

### **1. Superior Translation Algorithms.**

The main criterion of how translation software works is the translation quality. The new version @prompt 7.0 is built on the optimized translation algorithms that ensures the highest translation accuracy.

### **2. High Usability Interface of Flexible Linguistic Environment.**

The user friendly interface in the style of Microsoft® Office System 2003 is applied in the powerful linguistic editor. The new interface enhances the visualization of how the original text and translation are synchronized and features the usability options like easier access to customization options, more fruitful procedures of adjustment and editing.

### **3. Extended Dictionary Volumes.**

The general dictionaries for each translation direction of @prompt 7.0 have been increased substantially. For example, the English German and German English general dictionaries include now 700,000+ words and word collocations with translations!

### **4. Image Files Translations.**

Now @prompt 7.0 translates image files thanks to built in Readiris OCR software from Image Recognition Integrated Systems S.A. Company (I.R.I.S.). The new @prompt software can easily open any PDF, TIFF or JPG file, convert its text content into electronic text and translate it.

### **5. Microsoft® Office System 2003 Plug Ins.**

New @prompt 7.0 integrates plug ins into Microsoft® Office 2000/XP/2003 Word, Excel, Outlook®, PowerPoint®, and FrontPage® applications which enables the user to translate documents, e mails or presentations without leaving well known applications. The special plug in for XML documents translation is provided for Microsoft® Office 2003 Word.

### **6. Large Electronic Dictionary as a Stand Alone Application.**

Now @prompt 7.0 includes the Electronic Dictionary of a large volume as a stand alone application for all the available translation directions ... up to 1,000,000 words and word collocations with translations, up to 100 topics depending on the translation direction. As a result the user gets the translation software along with the Electronic Dictionary which can be used separately as well. The total volume of Electronic Dictionary for all the translation directions exceeds 6,000,000 entries!

### **7. More Specialized Domains.**

Users of @prompt 7.0 are able to translate texts from a greater number of subject areas. Now the list of specialized dictionaries supplied with the software includes seven dictionary titles for the following topics: Business, Computer, Internet, Law, Travel, Technical and Medicine (the four latter titles are new).

### **8. New Automatic Procedure KText to Dictionary.**

With the new procedure a user can automatically add words and their translations from hand made user glossaries (e.g., tables with words or word collocations and their translations) into existing user dictionaries or create new ones for @prompt 7.0 translation software. The procedure ensures a higher speed of customization process than it was in the previous version.
